

## ***OUR ORGANIC AND GMO-FREE STORY***

**Tanin Sevnica** is a successful part of organic farming system that promotes and enhances feed ecosystem health, animal nutrition and reduces pollution, with our product - **sweet chestnut extract**, used in animal nutrition as flavouring additive (cat. 2b. Reg. 1831/2003). It is 100 % natural product, based on polyphenols structure, produced from a natural sweet chestnut wood without any chemical additives and selling under a different trade names.

On the base of our Dossier for our sweet chestnut extract product applied to EU Commission in year 2018, it has amended organic farming Regulations (EC) No 889/2008 and (EC) No 834/2007 and included our product „**Chestnut extract**“ in their Annexes, in December, 12<sup>th</sup> 2019.

After that, the Authorised control body, responsible for organic certifying in Slovenia, has inspected and checked our production system from the raw material to the final products and they have stated that all system and a final products meet all requirements valid for organic products according to organic regulations and therefore, they have issued to us the **Organic Certificate** for Chestnut extract, in February, 10<sup>th</sup> 2020

The same Slovenian control body has checked also the requirements for GMO-free regulations and they have stated that all our products intended to animal nutrition are in accordance with GMO-free rules, so they have issued us **GMO-free certificate**, too, in March, 10<sup>th</sup> 2020.
